Lidar Technology

Lidar Technology was introduced on the Aeye Intelligent sensing Platform.

02

Mega Projects Under One Roof

We are getting ready to take part in new countries after Kazakhstan, Denmark and India.

03

Technologies that add comfort, confidence and value for transportation

With our Smart City applications, we implement systems integrated with information technologies in order to increase the quality of life, increase the level of welfare, manage resources and make them more efficient. We believe that technology exists to serve evolving human needs. That's why we put people at the center of every practice we do. We are constantly improving our services to provide reliable technology and solutions, and we provide solutions that will take on the challenges of today and tomorrow.

We Build the Future with Innovation

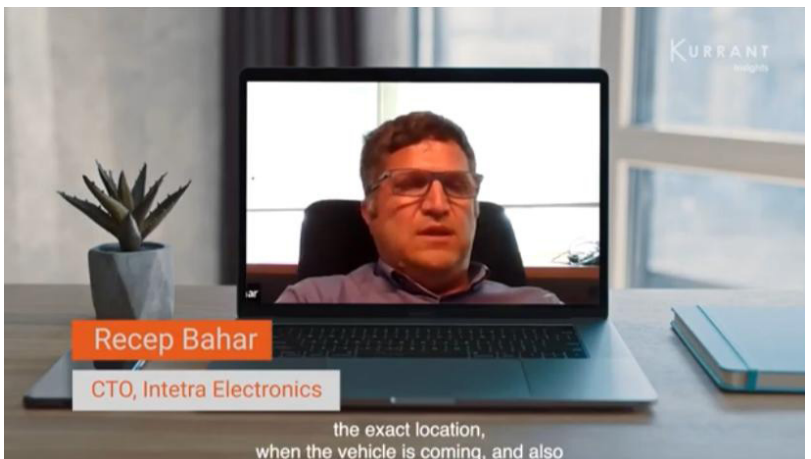

INTETRA
MEET BLOXHUB GLOBAL PARTNER, JOHN SYTMEN

BLOXHUB members have the unique opportunity to learn from Global Partner, John Sytmen's, vast **experience in internationalization** and company growth. John specializes in the **areas of Tech, Mobility, PV** and has great overall experience in scaling up businesses.

SIGN UP FOR A CHAT WITH JOHN
 OCTOBER 6TH, 2.00 - 4.00 PM
 MEMBERS LOUNGE

John Sytmen, our BLOXHUB Global Partner Business Development Director on sustainable urbanism, advanced technologies and globalization shared its experiences with companies within the BloxHub innovation eco-system. BLOXHUB Community, of which our Danish office is a member, sustainable urbanization and creating better cities around the world. It is an ecosystem of helping people. At the online member lounge meeting in October, BLOXHUB members, global partner John Sytmen's internationalization and where they can learn about their vast experience in company growth. They met on the platform. Its expertise in Technology, Mobility, PV and its global presence in the growth processes of companies

With his experience, John Sytmen offered innovative solutions to be used in the technologies of the future. We produce smart technologies for a better future. Livable and sustainable transportation solutions that add value to life. With INTETRA, transformations of cities with similar needs aims to start exploratory approach, innovative world vision, its role in the effective execution of physical and digital projects. shows in the field. Big data and computation, multitasking Its realization is based on the use of advanced technology. Our services that shape change, in all areas of transportation we ensure its implementation. We realize future expectations with our experience from the past.

“AEye and Intetra implement lidar-based automated toll solution”

We are happy to share the news that we have developed and commissioned the lidar-based system that we have developed in cooperation with AEye, the adaptive lidar solutions developer in the USA. US adaptive lidar solutions developer AEye and smart transportation systems

Intetra, a Turkish provider of end-to-end solutions for (ITS) and electronic toll collection (ETC) systems, announced the development and deployment of a lidar-based system. Intetra is launching a new automatic toll system in Turkey and Kazakhstan to expand the relationship globally to include other ITS applications and geographies.

“This lidar-based pricing system is accurate, real-time to provide detection and support automatic toll AEye to generate actionable and precise data. It takes advantage of its software-defined architecture.”he said

Road and Tunnel Electromechanics Fair Bringing Systems Together

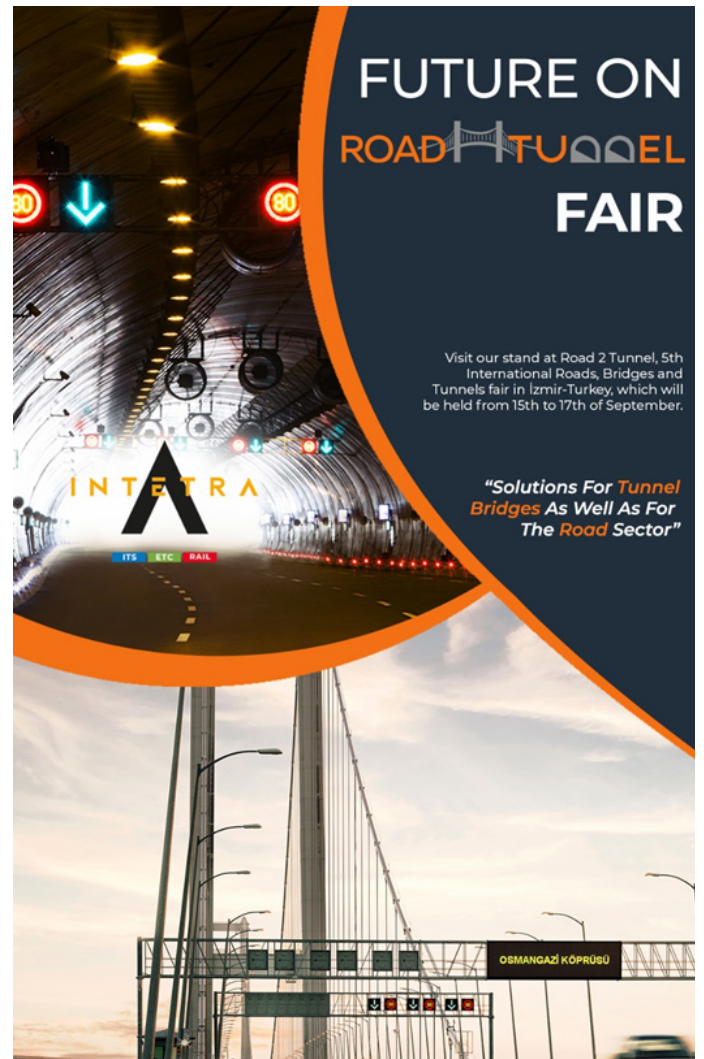

ÇWe met with our service buyers at the “Road 2 Tunnel” Fair with our solutions.

There was great interest in our stand at the Road 2 Tunnel, 5th International Highways, Bridges and Tunnels fair held in İzmir between 15-17 September.

As INTETRA, we are happy to present the solutions we apply in the Tunnel, Bridge and Highway industry:

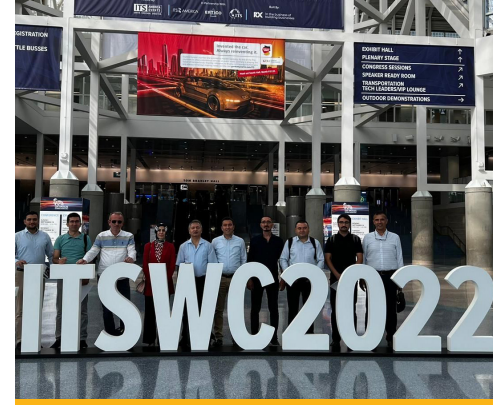

- - Intelligent Transportation Systems
- - Tunnel Electromechanical Systems
- - Intelligent Event Detection Systems
- - ITS Central Management Software

Tunnel electromechanical systems, traffic management, lighting, ventilation, communication, electronic, mechanical, automation and so on It is an integrated structure that includes systems. Intetra, by making tunnel electromechanical project and application provides end-to-end integration services

Visit our stand at Road 2 Tunnel, 5th International Roads, Bridges and Tunnels fair in İzmir-Turkey, which will be held from 15th to 17th of September.

“Solutions For Tunnel Bridges As Well As For The Road Sector”

ITS WORLD CONGRESS 2022

T.R. Our Ministry of Transport and Infrastructure and Turksat Satellite Communication Cable TV and Management Inc. continued under the leadership of Turkey Smart Transportation Systems Architecture preparation and evaluation studies one of the world's most important organizations With our colleagues as INTETRA at #ITSWorld2022 We took our place. International regulations, application examples, academic papers and solutions of many international companies our solution partner AEye, Inc. with Lidar-based electronic fare collection system we have developed was also launched in this organization. The product we developed and implement solutions simultaneously with the world, We continue our efforts to become a global brand in our sector.

INNOTRANS 2022

InnoTrans reopens its doors at 2022 Messe Berlin after 4 years. In the field of public transportation and transportation technologies, the sector In the organization, which includes hundreds of actors, many new solution and service are on display. T.R. Our Ministry of Transport and Infrastructure, especially TCDD and its affiliated companies Many brands from our country, including It's an honor to see you take part. In the topic of rail systems, which we started with our companies INTETRA and SAI - Scandinavian Automation Intelligence, With the solutions we produce, we aim to be among the important actors of the sector in the near future.
